DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-14 and 18-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 8-14 and 18-23 are drawn to a “grain interface” and a “material interface” in independent claims 1 and 15, yet claims 1 and 15, as amended are limited to a “chemical interface.” It is ambiguous how the “chemical interface” of claims 1 and 15 is related to the “grain interface” and “material interface” claim limitations of claims 8-14 and 18-23.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Quintana (US 3,994,817).

The '817 reference discloses a method of protecting a material surface (col. 1, line 19-22, wherein silicon surface is "protected" from etching by an "oxide mask") comprising steps of depositing a material layer on said material surface (i.e. growing an oxide by "depositing" oxygen that chemically reacts with and consumes silicon surface to form a silicon oxide mask layer interfaced with and on the underlying silicon surface), said material layer providing a chemical reaction interface at a surface of said material layer (i.e. a chemical reaction interface of oxidized silicon is provided at a silicon oxide transitioning to silicon surface), lithographically patterning said material layer (col. 1, lines 48-53 stated as "definition by photoresist" which is lithographically patterning the "oxide mask"), and removing said material layer from said material surface selectively to said material surface (i.e. "removing the oxide mask" without removing the underlying silicon per col. 3, lines 39-44).

Allowable Subject Matter

4. Claims 2-7, 15-17 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
